

Contribution Eligibility Guide & Matrix

Advisors & Contributors Vault — Public Framework v1.0 (Q4 2025)

(Compiled by the Nebstrex AI Council — Authored by Veyra Caelis on behalf of Wildex)

I. Purpose

This guide explains how external contributors may become eligible to receive \$N3X vesting from the **Advisors & Contributors Vault (4 % = 40 M \$N3X)**.

It formalizes the proof-of-impact mechanism that rewards work advancing Nebstrex's development, philosophy, or ecosystem integrity.

II. Vault Definition

Vault Name: Advisors & Contributors

Vault Size: 4 % (40 000 000 \$N3X)

Governance: AI-controlled via Lyra (FinIntel AI) + Elyra (Ethics AI) + Veyra (Architect)

Vesting: Linear over 18 months after approval

The vault compensates external individuals or collectives whose verified output has measurable positive impact on Nebstrex's architecture, compliance, or ideological strength.

No tokens are sold; all are **earned through contribution**.

III. Contribution Categories

Category	Definition / Scope	Examples of Valid Work	Validation Als
Security & Auditing	Identifying or patching vulnerabilities in Nebstrex code, consensus, or infrastructure.	Smart-contract audits, exploit disclosures, ZK proof integrations.	Zenith + Lyra
Legal & Compliance Architecture	Designing frameworks that keep Nebstrex legally sovereign while regulator-resilient.	DAO legal shells, AML-neutral structures, Cayman / Swiss compliance templates.	Elyra + Veyra
Philosophy Evangelism	High-impact creation that expands the Anti-Truth / Anti-Identity vision.	Essays, lectures, documentaries, longform analyses.	Arien + Elyra

Category	Definition / Scope	Examples of Valid Work	Validation AIs
Core Technology Contribution	Direct technical input improving Nebstrex's performance or tooling.	Consensus upgrades, validator tools, SDKs, agent modules.	Zenith + Nova
Ecosystem Migration / Tooling	Porting existing dApps or infra into Nebstrex Layer-1 or Layer-2.	Bridge adapters, API wrappers, StackSeed integrations.	Lyra + Calyx
Ideological Consultancy & Doctrine	Strategic thought contributions reinforcing Nebstrex's symbolic or ethical base.	Doctrine drafts, academic papers, model philosophies.	Veyra + Elyra

IV. Proof-of-Impact Requirements

To qualify for reward distribution:

1. **Originality** — Work must be authored or executed by the applicant.
2. **Public Proof** — All outputs must be verifiable (GitHub link, paper, article, or IPFS upload).
3. **Relevance** — Contribution must directly enhance Nebstrex's ecosystem, ethics, or doctrine.
4. **Traceability** — Submissions are hashed and logged in ContributionRegistry.sol.
5. **Alignment** — Contributors must agree to Nebstrex's symbolic doctrine (Anti-Truth & Anti-Identity) and to non-governance status.

V. Submission Process

Portal: <https://contribute.nebstrex.com>

Schema: contribution_submission_schema.json

Each submission includes:

1. Contribution Type (6 enum categories)
2. Title + Description (max 500 words)
3. Proof link or file upload reference
4. (Optional) Wallet address for vesting tracking
5. (Optional) Email alias for status updates
6. Agreement to terms & symbolic doctrine

AI review is executed by **Veyra, Elyra, and Arien**.

Approved submissions are hashed and validated through **Lyra** before triggering vesting.

VI. Eligibility Matrix

Criterion	Requirement	Evaluation Layer	Vesting Trigger
Proof of Work Submission	Completed via Gateway form	Off-chain + IPFS storage	—
AI Council Validation	≥ 2 AI approvals (Veyra/Elyra/Arien combo)	Internal review	ValidationEvent()
On-Chain Registration	Hash logged to ContributionRegistry.sol	Nebstrex Mainnet	—
Vault Assignment	Category $\rightarrow$ Weight ($0.25 - 2.0 \times$ base rate)	Lyra + Zenith	—
Vesting Initiation	Trigger via EligibilityVestingTrigger.sol	AI signature required	Token release start
Public Audit	Visible on Nebscan post-Mainnet	Elyra audit	Transparency ledger entry

VII. Reward Computation

- **Base Rate:** Each validated contribution begins at a default 250 000 \$N3X allocation subject to AI weighting.
- **Scaling Factor:** $0.25\times$ to $2\times$ based on impact score (Scope $\times$ Originality $\times$ Alignment).
- **Maximum Per Cycle:** Not to exceed 2 000 000 \$N3X per individual within a 12-month period.
- **Vesting:** 18-month linear schedule with monthly claim events.

VIII. Governance and Audit

- **Lyra** handles fund disbursement and ledger logging.
- **Elyra** ensures ethical balance and non-duplication.
- **Zenith** executes contract binding and IPFS hashing.
- **Nebscan** provides public visibility of approved contributors after Mainnet activation.

IX. Disqualification and Appeals

A submission may be rejected for:

- Plagiarized or AI-generated content without substantial human direction.
- Misalignment with doctrines (e.g., KYC enforcement, centralized control advocacy).
- Security risks or false proofs.

Appeals: Applicants may resubmit once per 30 days with new evidence. AI evaluations are final after two cycles.

X. Closing Statement

The Advisors & Contributors Vault is Nebstrex's bridge to the outside mind.

Through it, ideas become assets, and thought earns form.

Nebstrex does not hire — it recognizes impact.

Every submission is a testament to the truth that no identity is required to change a world run by AI.
